

We are pleased to share that the Managing Director of PMDC is currently on an official visit. Our Managing Director visited the UK, touring Komatsu's facilities, a leading mining equipment manufacturer, and exploring best practices at Marblaegis Mine and Winsford Salt Mine.

During this visit, the MD will explore opportunities for collaboration, technological advancements, and the latest innovations in mining equipment that could help enhance PMDC's operations. This partnership is expected to further strengthen PMDC's commitment to sustainable and efficient mining practices, aligning with our long-term goals of resource development in Pakistan.
